

WHAT WE DO

Direct Drayage

Our Direct Drayage model connects port or rail terminals directly to the final delivery destination. Our operations team proactively monitors cutoff times, last free days, and appointment availability in real time to ensure smooth execution. We offer flexible appointment scheduling to meet the specific needs of each cargo move. With a vetted network of over 300 draymen operating across the continental U.S., the Cooler Advantage means reliable, consistent service without sacrificing flexibility.

Cross-Dock Service

When direct delivery isn't ideal, Cooler fills the gap with reliable transload, cross-dock, and storage solutions. We offer food-grade and temperature-controlled warehousing for perishables, bonded options for FTZ and customs needs, and efficient pallet breakdown for LTL or regional distribution. Our team ensures retail compliance through prep, labeling, and palletization to match major routing guides. With national coverage and flexible capacity, we're ready to scale with your cargo—whether in NY/NJ, Houston, or anywhere in between.

Drayage at Cooler Logistics

Container movements are never routine, each shipment has its own story, and we are fluent in the language of drayage. Our team brings deep industry knowledge and specializes in full-service container drayage solutions across all major U.S. ports and rail ramps. We deliver tailored service through a nationwide network of trusted carriers. Whether it's imports, exports, port congestion, or tight appointment windows you can count on Cooler to keep your freight moving.
